

Safety Data

International Health's Biotech Manufacturer has had five independent safety and toxicity tests completed on its 10 PPM silver product. The product was tested in animals at as much as 200 times the normal adult dosage, or the equivalent of an adult consuming 32 full ounces of the 10 ppm product at one sitting. In conclusion to the animal tests, the independent medical testing laboratory stated that the Super Silver Solution® was found to be completely non-toxic to the test animals. The product was also tested for cytotoxicity in both human epithelial cells and also African green monkey or Vero cells, at both the regular 10 ppm level. In all four cytotoxicity tests the products were found completely non-toxic to both the human and Vitro cells.
